

## Fully Interactive Visualization Experience

iRise Enterprise  
Platform v8.10

JustinMind  
v4.5

Axure  
v6.5

Protoshare  
v6.5

Team-based creation of working simulations using drag and drop controls	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Simulate real-world applications with navigation, rich interactions and business logic	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Simulations that persist data changes with every interaction	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Pre-built content enabling fast visualizations of configurations or custom applications	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Complete set of working iOS and Android controls for high-fidelity mobile simulations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Native-like mobile experiences for devices and platforms	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Customized in-house training, mentoring and certifying users to accelerate usage	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Global Real-time Visualization Collaboration

Global, real-time team-based collaboration with shared, secured workspaces	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Incorporate feedback immediately into simulation for real-time iterating and testing	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Ability to review simulation offline and easily provide contextual feedback	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Stakeholders can easily step through user flows with simulation guides	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Business analysis services available to drive requirements ideation with stakeholders	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Accelerate Project Delivery

Enable real-time documentation of requirements in context of the simulation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Auto-generate functional specifications from simulation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Reduce development time with high-fidelity code generation from simulations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Acceleration services available to build custom libraries and widgets for immediate use	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

## Integrate into Existing Development Tools and Processes

Fully extensible library of widgets and custom-built UI controls and behaviors	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Universal API enables integration into existing proprietary systems and processes	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Authenticate your stakeholders leveraging LDAP for safe and effective collaboration	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Import existing requirements into simulation to ensure project integrity and tracking	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Integrate into RM and ALM tools to facilitate management of current SDLC process	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Services available to integrate APIs into existing platforms, systems and processes	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Focus on Customer Success

Platform for organizational provisioning, training, project tracking and best practices	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Global Phone Support	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Program Management services that focus on scope control and risk mitigation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Adoption services at project level focused on long term organizational success	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
